

## Sloan Museum of Discovery

Located on the campus of the Flint Cultural Center and within walking distance of several other entertainment, arts, and educational centers, the Sloan Museum of Discovery reopened in July of 2022 and features three all-new hands-on interactive galleries. The Hagerman Street Early Childhood Learning Gallery is an interactive child-sized neighborhood with roundabouts for tricycles, shops, and a charming three-story tree house. The History Gallery features regional history and historical vehicles, including a Hellcat Tank from WWII and rare collections of vintage and concept cars. The Discovery Hall Science Gallery teaches science with fun, hands-on exhibits like the interactive Great Lakes water table, Earth Globe climbing structure, and 10 other interactives. The museum also now serves beverages, sandwiches, salads, and snacks at The Coffee Beanery Café. Be sure to stop by their large gift shop for unique gifts and souvenirs and take a pick at the museum's four learning labs & maker's space.
